

"Roof top Solar Power" Power Purchase Agreement

A Power Purchase Agreement (PPA) allows businesses to purchase solar electricity at no upfront cost

How It Works

PPA term is for 25 years, during which we install, operate and maintain the system at our cost

You provide the site

for the solar panels, inverters, battery-bank. (rooftop or open land)

We provide the rest

financing, installation, and long-term system maintenance for the term of the PPA

Your organization purchases the electricity produced

at a pre-determined tariff rate

BENEFITS OF PPA

Immediate reduction in electricity costs with no upfront spending— free up capital for your core business and stay ahead of competition

Upto date on technological innovation as we continuously upgrade our systems regularly to be in line with your increased power requirement

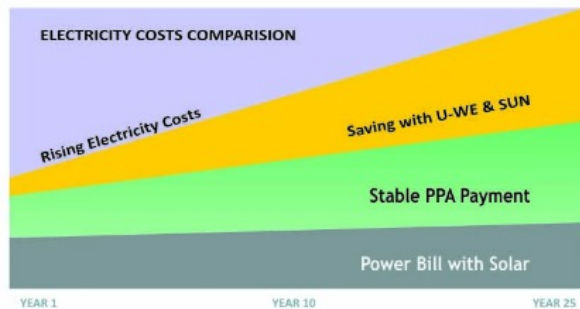

No performance risks— we build the system and maintain it

Demonstrate corporate responsibility to customers and partners with a switch to clean, sustainable electricity

U-WE & SUN SOLAR PPA
